AUKEY PB-WL03 20000mAh Wireless Charging Power Bank

User Manual

Product Diagram

What is USB Power Delivery (PD)?

USB Power Delivery is a universal multi-voltage charging standard that dynamically negotiates power delivery between the power bank and the connected device to safely and efficiently recharge a wide range of compatible devices.

To get USB PD, the following are required:

- Device (phone, tablet, laptop) that supports USB PD
- Power bank that supports USB PD
- USB-C to C cable or Apple USB-C to Lightning Cable

What is Quick Charge 3.0?

Quick Charge 3.0 is four times faster than conventional charging. Quick Charge 3.0 is engineered to deliver twice as fast as Quick Charge 1.0 and is up to 28% more efficient than Quick Charge 2.0, backward-compatible with Quick Charge 2.0/1.0 devices.

Dimensions

159.7 x 75.0 x 20.0 mm
